29 July 2021

Accsys Technologies PLC
("Accsys", the "Group" or the "Company")

Issuance of Shares and Total Voting Rights

Accsys, the fast-growing and eco-friendly company that combines chemistry and technology to create high performance, sustainable wood building products announces the conditional issue of 71,736 new ordinary shares of €0.05 each in the Company ("Shares") to the Company's Employee Benefit Trust ("EBT") the beneficiaries of which are senior employees.

These Shares have been conditionally issued and allotted following the exercise of nil cost options, granted in 2016 under the Company's 2013 Long Term Incentive Plan ("Plan").

The 71,736 Shares are expected to be admitted to trading on AIM and Euronext Amsterdam on 30 July 2021. The Company does not hold any shares in treasury.

The total voting rights in the Company following the issue of the Shares will be 192,366,361. Following the issue of the Shares, this figure may be used by shareholders as the denominator for the calculations by which they may determine if they are required to notify their interest in, or a change to their interest in, the Company's securities under the FCA's Disclosure Guidance and Transparency Rules.

Notes to editors:

Accsys (Accsys Technologies PLC) is a fast-growing business with a purpose: changing wood to change the world. The company combines chemistry, technology and ingenuity to make Accoya® wood and Tricoya® wood elements: high performance wood products that are extremely durable and stable, opening new opportunities for the built environment and giving the world a choice to build sustainably. Accsys transforms fast-growing, certified sustainable wood into building materials with an up to 50-year warranty, locking carbon stored in the wood into useful products for decades, with performance characteristics that match or better those of non-renewable, resource-depleting and polluting alternatives. Accsys is listed on the London Stock Exchange AIM market and on Euronext Amsterdam, under the symbols 'AXS'. Visit www.accsysplc.com

Accoya® solid wood is sustainable, durable, and stable with exceptional performance, finish and sustainability. Accsys' proprietary acetylation process makes the wood more dimensionally stable and because it is no longer easily digestible, extremely durable. It is one of very few building materials to be Cradle to Cradle Certified™ at the Gold level, with a Platinum rating for Material Health, confirming that no harmful or toxic additives or chemicals are present to leach out into the environment. Primary applications for Accoya® wood include windows, doors, cladding and decking, where the combination of performance and sustainability benefits compete favorably against hardwoods, plastics, metals and concrete. Visit www.accoya.com

Tricoya® acetylated wood elements are produced for use in the fabrication of panel products such as medium density fibreboard (MDF). Panel products made with Tricoya® wood elements are truly durable and stable enough for use outdoors and in wet environments, unlocking new possibilities for design and construction. They have been lauded as the first major innovation in the wood composites industry in more than 30 years and bring the flexibility of traditional panel products and sustainability benefits of wood to a whole new range of applications. Visit www.tricoya.com
