## **2021 Annual Report and Notice of Annual General Meeting**

Accsys, the fast-growing and eco-friendly company that combines chemistry and technology to create high performance, sustainable wood building products, announces that the Group's 2021 Annual Report and Accounts and Notice of Annual General Meeting (AGM) are now available to view on the Company's website at <https://www.accsysplc.com/investors/reports-results/> and <https://www.accsysplc.com/investors/corporate-governance/> respectively.

The documents will today be posted to shareholders, distributed via the website or emailed based on shareholders' preferences.

The Company's Annual General Meeting will be held at its offices at Brettenham House, 19 Lancaster Place, London, WC2E 7EN, UK, on Friday 17 September at 14.30 (UK time).

At present the Company anticipates holding the AGM at its offices, however the COVID-19 situation is constantly evolving, and the UK Government may change current rules relating to such meetings. Any changes to the AGM as a result will be communicated to shareholders via a Regulatory Information Service before the meeting.

**Ends**

**Notes to editors:**

**Accsys** (Accsys Technologies PLC) is a fast-growing business with a purpose: changing wood to change the world. The company combines chemistry, technology and ingenuity to make Accoya® wood and Tricoya® wood

elements: high performance wood products that are extremely durable and stable, opening new opportunities for the built environment and giving the world a choice to build sustainably. Accsys transforms fast-growing, certified sustainable wood into building materials with an up to 50-year warranty, locking carbon stored in the wood into useful products for decades, with performance characteristics that match or better those of non-renewable, resource-depleting and polluting alternatives. Accsys is listed on the London Stock Exchange AIM market and on Euronext Amsterdam, under the symbols 'AXS'. Visit [www.accsysplc.com](http://www.accsysplc.com)

**Accoya**<sup>®</sup> solid wood is sustainable, durable, and stable with exceptional performance, finish and sustainability. Accsys' proprietary acetylation process makes the wood more dimensionally stable and because it is no longer easily digestible, extremely durable. It is one of very few building materials to be Cradle to Cradle Certified™ at the Gold level, with a Platinum rating for Material Health, confirming that no harmful or toxic additives or chemicals are present to leach out into the environment. Primary applications for Accoya<sup>®</sup> wood include windows, doors, cladding and decking, where the combination of performance and sustainability benefits compete favorably against hardwoods, plastics, metals and concrete. Visit [www.accoya.com](http://www.accoya.com)

**Tricoya**<sup>®</sup> acetylated wood elements are produced for use in the fabrication of panel products such as medium density fibreboard (MDF). Panel products made with Tricoya<sup>®</sup> wood elements are truly durable and stable enough for use outdoors and in wet environments, unlocking new possibilities for design and construction. They have been lauded as the first major innovation in the wood composites industry in more than 30 years and bring the flexibility of traditional panel products and sustainability benefits of wood to a whole new range of applications. Visit [www.tricoya.com](http://www.tricoya.com)
