Chief Executive

Tricoya® panels enable creative exterior cladding designs

TRICOYA®

FY21 & PROJECT STATUS

FY21 Hull construction progressed to final stages

- World-first Tricoya® plant being constructed at Hull, UK
- FY21 progress: good progress in Q2 after initial Covid-19 impact; final floors of acetylation tower lifted into place in October 2020

Ongoing recent challenges

- April 2021: Trading Update: 3-6 month delay in final construction
- 7 June 2021: Lead contractor purported to terminate lead EPC contract

Project update

- Contract now terminated, Accsys in process of taking over
- Evaluating potential to project manage final works directly - may not need another lead contractor
- Conducting gap analysis to validate remaining works, costs and timeline

TRICOYA®

OVERVIEW

World-first Tricoya® plant

Tricoya® consortium established in 2017

- €80m plant costs incurred to date
- 3 year ramp up to full capacity; break-even at ~40% capacity

High value product, Strong market opportunity

- Market seeding: strong demand, limited production
- Customer offtake agreements with MEDITE & FINSA

Plant & technology

- New technology with continuous production process
- Wood chips acetylated directly, different feed stocks
- 30,000 metric tonnes (40,000 m³ equivalent) capacity, extendable

Malaysia

- Agreement with Petronas Chemicals Group Berhad to evaluate Tricoya® production plant; investment decision after Hull established

OVERVIEW

CHANGING WOOD TO CHANGE THE WORLD

1 World-leading product & technology

High performance, sustainable wood products, with world leading technology

2 Significant market opportunity

Currently ~2% penetration of our 2.6 million m³ global achievable market

Up to 1 million m³ achievable market opportunity identified in North America

3 Global growth strategy

Delivering 5X production capacity growth by 2025

OUR PRODUCTS

CHANGING WOOD

Our unique technology

Creating superior performance wood

Our Products

World leading

Our world-leading process and technology is unique.

Acetylation

Our process uses acetic anhydride to enhance the fundamental properties and performance characteristics of wood.

Protected IP

We have extensive know-how and over 330 patents covering 27 distinct inventions in over 40 countries.

Durable

Outperforming the best tropical hardwoods.
50 year warranty above ground and 25 year under ground or in water.

Stable

Outstanding dimensional stability, indoors or outdoors.
Over 75% reduction in swelling from moisture uptake.

Sustainable

Produced from fast-growing, FSC® certified wood sources.
Locks away carbon for longer.

- Solid timber product
- High performance & sustainability
- Alternative to hardwoods, softwoods, PVC & aluminium etc
- Produced at Arnhem plant

Windows

Cladding

Decking

Doors

- Tricoya® wood elements for panel production
- Versatile material for use even in wet conditions
- Value-enhancing for panel manufacturers
- World-first plant under construction in Hull

OUR MARKET

SIGNIFICANT GLOBAL GROWTH OPPORTUNITY

A Large Global Market

The global wood production market produces over 800 million m³ annually across lumber and engineered wood products¹.

Our products also compete within adjacent construction materials markets, as a substitute for non-wood materials and panels: PVC, aluminium etc.

Significant Demand

Penetrating these significant markets by targeting **latent substitutional demand** for our products based on their superior qualities:

- Quality & Performance
- Sustainability
- Product lifecycle

Market focus

Regions:

- UK, Western Europe & Nordics
- North America
- Asia Pacific

Categories:

- Windows
- Doors
- Cladding
- Decking
